

Mommy's Got a Baby in Her Tummy

Mor har en baby inde i maven

by Lars Daneskov

Mummy's Got a Baby in Her Tummy is aimed at the child who is going to be an older brother or sister. The book explains all the complicated things, all the strange things and all the quite incredible things that happen – week by week – when a baby brother or sister is on the way.

Can it really be true that the baby pees in the amniotic fluid it is floating about in? Is it true that the baby is covered in hair? And why is Mummy suddenly tired all the time and eats weird things?

This is pregnancy explained in a way even a child can understand, making the wait child-friendly and fun.

Lars Daneskov (born 1963) is the father of four, a journalist and the author of among other titles the bestselling *Far på Færde* and *Mummy's Got A Baby in Her Tummy* from 2012.
