

# Slimming with LCHF

## Ned i vægt med LCHF

by Diana Kaiser

*Slimming with LCHF* is for all women and men who are eager to lose weight, but are looking for a diet where shedding pounds feels easy. The book offers practical advice on how to achieve an effective weight loss by eating a diet low in carbohydrates and with fat in filling amounts and how to turn LCHF into a lifestyle.

The LCHF (Low Carb High Fat) diet is a huge success. The basic principle behind it is to avoid food that is rich on carbohydrates and with a low level of natural fats. The food pyramid, as we know it traditionally, has been turned upside down. The -principle is instead to eat lots of proteins, heaps of vegetables, natural fats from meat, butter, oils and full fat dairy products supplemented with small quantities of nuts and berries – while at the same time eating less bread, pasta, rice and so forth. Eating LCHF gives you the chance to eat your fill of delicious food while gaining a new, healthy lifestyle with the added benefit of a more vigorous feeling and greater well-being.

**Diana Kaiser** is a clinical dietician, who works with the LCHF principles on a daily basis at a renowned Danish diet clinic.
